

Test the cart functionality.

Weak Prompt

Write the testcases for the cart related function

What I Feel is Missing

No platform information, checkout and Add/remove/edit options

Instruction

Generate comprehensive test cases for Cart Functionality.

Context

Simple web application where user can purchase the product

Example

Select product, add, remove, checkout option and home page button visible

Persona

You are a senior QA engineer who have the 5 plus years' experience in writing testcases.

Output Format

Summary with req id

Description

Precondition

Steps

Expected result

Tone

Professional, detailed, and suitable for production QA documentation.

 **Rewritten Prompt**

You are a Senior QA Engineer with 5+ years of experience in writing comprehensive test cases for web applications.

Generate comprehensive test cases for Cart Functionality.

Context:

The application is a simple web-based e-commerce application where users can purchase products.

Example Scenarios:

- Select a product*
- Add a product to the cart*
- Remove a product from the cart*
- Proceed to checkout*
- Verify Home Page button visibility*

Requirements:

Generate positive, negative, boundary, and validation test scenarios covering cart operations and checkout flow.

Output Format:

- Requirement ID*
- Summary*
- Description*
- Preconditions*
- Test Steps*
- Expected Result*

Tone:

Professional, detailed, and suitable for production QA documentation.

API Testing

Weak Prompt

Write API test cases for user registration.

What I Feel is Missing

No API endpoint details, HTTP method, status code, and output format

Instruction

Generate comprehensive API test cases and automation scenarios for a login API with positive and negative scenario.

Show more lines

Context

Application is web-based e-commerce platform that exposes REST APIs for user authentication.

Example

POST /login

Valid Username + Valid Password → 200 OK

Valid Username + Invalid Password → 401 Unauthorized

Persona

You are a senior QA engineer who have the 5 plus years' experience in writing testcases.

Output Format

Summary with req id

Description

Precondition

Steps

Expected result

Tone

Professional, detailed, and suitable for production QA documentation.

 Rewritten Prompt

You are a Senior API Test Automation Engineer with 5+ years of experience in REST API testing.

Generate comprehensive API test cases for the Login API of a web-based e-commerce application.

Context:

The application exposes a REST API endpoint POST /login for user authentication.

Example Scenarios:

- Valid username and valid password*
- Valid username and invalid password*
- Locked user account*
- Empty username*
- Empty password*

Generate positive, negative, and boundary test scenarios.

Provide the output in the following format:

- Test Case ID*
- Summary*
- Preconditions*
- Request Payload*
- Test Steps*
- Expected Status Code*
- Expected Response*

Ensure the output is professional, detailed, and suitable for production QA documentation.

Role-Based Access Control

Weak Prompt

Write test cases for user roles.

What I Feel is Missing

user details is missing, application details, and user privileges

Instruction

Generate comprehensive valid RBAC functionality test cases with positive and negative scenario.

Context

The application is a web-based system with multiple user roles including Admin, Manager, and Standard User. Each role has different permissions to access pages and perform actions.

Example

Admin can create, edit, and delete users.

Manager can view and update records but cannot delete users.

Standard User can only view assigned records.

Valid Username + Invalid Password → 401 Unauthorized

Persona

You are a Senior QA Engineer with 5+ years of experience in security and access control testing.

Output Format

Summary with req id

Description

Precondition

Steps

Expected result

Priority

Tone

Professional, detailed, and suitable for production QA documentation.

 Rewritten Prompt

You are a Senior QA Engineer with 5+ years of experience in security and authorization testing.

Generate comprehensive test cases for Role-Based Access Control (RBAC) functionality.

Context:

The application supports multiple user roles:

- Admin
- Manager
- Standard User

Permissions:

- Admin can create, edit, delete, and view all records.
- Manager can view and update records.
- Standard User can only view assigned records.

Generate positive, negative, boundary, and security-related test scenarios.

Example Scenarios:

- Verify Admin can access User Management page.
- Verify Standard User cannot access Admin pages.
- Verify unauthorized URL access is blocked.
- Verify hidden menu options are not accessible directly through URLs.

Provide the output in the following format:

- Test Case ID
- Summary
- Preconditions
- User Role
- Test Steps
- Expected Result
- Priority

Use a professional and production-ready QA documentation style.
